Proud Partner of United Way's Education Initiative

What is Learn United?

Learn United is United Way's Education Initiative focused on engaging the community to collaboratively support children's success in early learning, literacy, school and life. United Way of Allen County believes education is a top priority for a viable, thriving community. To maximize outcomes in education, Learn United utilizes a collective impact model premised on the belief it takes all members of the community working together to ensure children succeed from cradle to career. The Learn United Collaborative is a group of autonomous community organizations convened by United Way of Allen County to find common ground in our shared core mission, leverage resources and find synergistic opportunities to engage the community to support children's success in school and life.

Attend October 6th to find your spot in Learn United!
